

Non-GAAP Measures

The Company's presentations may include certain non-GAAP financial measures, such as its return on invested capital ("ROIC") calculation and its adjusted debt/EBITDAR ratio. This supplemental information should not be considered in isolation or as a substitute for the related GAAP measures.

Return on Invested Capital

We believe that ROIC is meaningful for management and investors because it measures how effectively we deploy our capital base. We define ROIC as follows:

Net Operating Profit After Tax (Page 2)

We define net operating profit after tax as operating income for the trailing twelve months less income taxes calculated using the effective tax rate for that period.

Average Debt and Equity (Page 2)

We define average debt and equity as the average of beginning and ending long-term debt (including current installments of long-term debt) and equity for the trailing twelve months. Beginning debt and equity may be adjusted for changes in accounting principles which require historical restatement or an opening balance sheet adjustment to the amount previously reported.

Return on Invested Capital (Page 2)

We define ROIC as net operating profit after tax divided by average debt and equity.

Adjusted Debt/EBITDAR

We believe that our adjusted debt/EBITDAR ratio better enables management and investors to understand and analyze our level of indebtedness in relation to our capital structure. We define adjusted debt/EBITDAR as follows:

Adjusted Debt (Page 3)

We define adjusted debt as long-term debt (including current installments of long-term debt), plus short-term debt, plus eight times operating rents for the trailing twelve months. We continue to use the eight times operating rents methodology to calculate adjusted debt post implementation of Accounting Standards Codification Topic 842, *Leases*, ("Topic 842") as it typically results in a more conservative estimate and is still used by a primary U.S. rating agency.

EBITDAR (Page 4)

We define EBITDAR as net earnings before interest and other, net, income taxes, depreciation and amortization, and operating rents calculated on a trailing twelve month basis.

Adjusted Debt/EBITDAR (Page 5)

We define adjusted debt/EBITDAR as adjusted debt divided by EBITDAR.

Return on Invested Capital Calculation

(USD millions)	Twelve Months Ended	
	January 28, 2024	January 29, 2023
Net earnings	\$ 15,143	\$ 17,105
Interest and other, net	1,765	1,562
Income taxes	4,781	5,372
Operating income	\$ 21,689	\$ 24,039
Income tax adjustment ⁽¹⁾	(5,205)	(5,745)
Net operating profit after tax	\$ 16,484	\$ 18,294
Average debt and equity	\$ 44,955	\$ 41,055
Return on invested capital	36.7%	44.6%

(1) Defined as operating income multiplied by our effective tax rate for the trailing twelve months.

Adjusted Debt Calculation

(USD millions)	Period Ended	
	January 28, 2024	January 29, 2023
Long-term debt (including current installments of long-term debt)	\$ 44,111	\$ 43,193
Total debt	\$ 44,111	\$ 43,193
Eight times operating rents ⁽¹⁾	10,872	9,352
Adjusted debt	\$ 54,983	\$ 52,545

(1) We continue to use the eight times operating rents methodology to calculate adjusted debt post Topic 842 implementation as it typically results in a more conservative estimate and is still used by a primary U.S. rating agency. As of January 28, 2024 and January 29, 2023, the operating lease liabilities included on our consolidated balance sheets were \$8,132 million and \$7,171 million, respectively.

EBITDAR Calculation

(USD millions)	Twelve Months Ended	
	January 28, 2024	January 29, 2023
Net earnings	\$ 15,143	\$ 17,105
Interest and other, net	1,765	1,562
Income taxes	4,781	5,372
Depreciation and amortization ⁽¹⁾	3,206	2,935
Operating rents	1,359	1,169
EBITDAR	\$ 26,254	\$ 28,143

(1) Includes depreciation of distribution centers and tool rental equipment included in cost of sales, and excludes debt issuance costs and other debt-related amortization of \$41 million and \$40 million for the twelve months ended January 28, 2024 and January 29, 2023, respectively, which is included in interest and other, net above.

Adjusted Debt/EBITDAR Calculation

(USD millions)	Twelve Months Ended	
	January 28, 2024	January 29, 2023
Adjusted debt	\$ 54,983	\$ 52,545
EBITDAR	\$ 26,254	\$ 28,143
Adjusted debt/EBITDAR ⁽¹⁾	2.1x	1.9x

(1) Adjusted debt/EBITDAR for the twelve months ended January 28, 2024 and January 29, 2023 would have been 2.0x and 1.8x, respectively, had it been calculated using the operating lease liabilities recorded on the consolidated balance sheet. We continue to use the eight times operating rents methodology to calculate adjusted debt post Topic 842 implementation as it typically results in a more conservative estimate and is still used by a primary U.S. rating agency.
